

Examples of Transportation Performance Measures

- **How far will people travel?** (vehicle-miles traveled (VMT))
- **How much time will people spend in their cars?** (vehicle-hours traveled (VHT))
- **How crowded will the roads be?** (volume to capacity ratio)
- **How fast can I travel to work?** (peak hour roadway speeds)
- **Will there be more/less cars on the road?** (changes in roadway volumes)
- **How do we measure congestion?** (delay/level of service)
- **How many cars will be in line ahead of/behind me?** (queuing)
- **How long will it take me to get from here to there?** (travel time)
- **How often will I have to fill up my gas tank?** (fuel consumption)
