

# ROUNDAOBOUTS DESIGN

**Key Roundabout Features**

**Single-Lane Roundabout**

**Double-Lane Roundabout**

## Basic Design Characteristics

- Slow Entry Speeds (20-30 mph).
- Entering vehicles yield to circulating vehicles.
- Pedestrian crossing 25' or 50' behind yield line.
- Splitter islands provided for pedestrian refuge.

- Interior aprons provided for truck turning movements.
- Inscribed diameter 100' – 200'.
- Access to central island not permitted.
- Flared entries (2 lanes) can be utilized with single lane approaches to increase capacity.
